WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

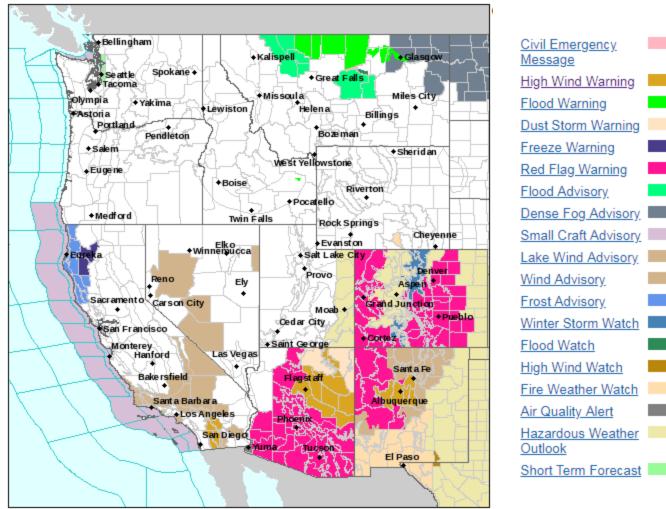

A few showers from a low pressure system have already developed in northern areas. Scattered showers are expected in the mountains with snow levels around 4,000 feet Isolated showers are possible at lower elevations as well. The low will move into central CA by this morning. Rain chances are higher in the western and southern portions of the region, but amounts will be light, from a trace to a quarter of an inch. The low will move out of the area and rain chances will end by this afternoon. By this afternoon northerly winds will develop from the western Cascade-Sierra slopes to the foothills on the west side of the Sacramento Valley. Peak gusts will be 20-25 mph. Friday through Monday will be dry with temperatures 10-15 degrees above normal as high pressure builds in from the Pacific. N-NE winds will continue in the same areas, with peak gusts of 25-30 mph coming Saturday and Sunday mornings. Minimum afternoon humidity over the weekend will be 10-15% in the areas affected by the winds.

SOUTHERN CALIFORNIA

A cold, compact storm which will quickly move through the area this morning. Brief moderate to heavy rain may occur near the higher terrain from Santa Barbara and Kern County northward. The snow level will drop to 4,500 feet and a brief flurry may be possible across I-5 and I-15 early this morning. Storm total precipitation will be light with most areas seeing under a quarter of an inch, but amounts will be highly variable due to the showery nature of the storm system. Skies will clear out from north to south today with a stiff northwest wind developing by the afternoon hours. Winds of 25-40 mph will be possible over the mountains and desert with some gusts over 50 mph possible in Kern County toward the evening. Temperatures will be 10-20 degrees cooler today, but a warming trend will quickly follow Friday into the weekend. Expect partly to mostly sunny skies and light winds Saturday and Sunday with highs climbing to above normal readings. Highs will approach 90 in some of the valleys by Sunday, but coastal areas will see much cooler temperatures with marine layer stratus returning during the night and morning hours.
